2. Terms and Conditions .

The official name of the Consolidation Token is called COINsolidation Token.

COINsolidation International .

COINsolidacion Token is created, distributed and developed in virtual Estonia and supported by the e-residency of its CEO & Founder. All economic activity of buying and selling will be stored and located at the Estonian address that its CEO and/or Founder can establish or open by virtue of the e-residency, as well as all tax duties will be filed in Estonia or if applicable its subsidiary Blockoin Technology Limited in Gilbraltar.

All software developed by COINsolidation International and OpenQbit is described and understood by the acronym EE. A user covers the context of who uses the software for development or for final use.

All crypto coin operations are operated by Blockoin Technology Limited, based in Gibraltar with IBAN in process. Whenever we use the trade name COINsolidation International, we

refer to Blockoin Technology Limited which refers to and/or the individuals who assist in the development of extensions for generic use in the area of assets. COINsolidation International is a provider of applications that help asset service providers and is exclusively oriented to the area of software development and computer services for companies looking to implement Blockchain business.

COINsolidation International does not keep, nor does it keep any type of external assets, it only keeps and manages its own assets when it was created and these assets are based on donations oriented to the maintenance and support of the extensions (software) created.

The end user that exchanges in any of its modalities (purchase or sale) of COINsolidation Token agrees to the terms mentioned here and that the above mentioned exchange modalities will be interpreted as donations for the support and maintenance of COINsolidation International extensions.

COINsolidation International has its E-Residency given in Estonia.

AppInventor, Kondular, AppyBuilder are registered trademarks of their respective companies. Any use, support the user must agree in full with their respective terms and conditions of use of each company, COINsolidation Estonia INC, have no business or legal relationship with them.

Any individual or entity that uses the Exchange Extensions (EE) is aware and fully agrees that each transaction made by the use of EE with a donation is implicit and clear in the fees mentioned for the use of (EE), as well as such transactions may not be claimed in any form and is understood in its entirety from the user whether individual or entity that are donations for maintenance of the software or in its case for what its founder intended at its discretion, based on the ICO distribution plan described in the White Paper of COINsolidation: https://github.com/coinsolidation/whitepaper

COINsolidation International is referenced to an individual approval in the form of E-Residency based in Estonia.

Opensource and commercial versions of the EE (Exchange Extension) system are licensed at http://wwwCOINsolidation.org or request information at license@consolidation.org

COINsolidation, Blockoin, Bankoin are trademarks being registered by COINsolidation.org International.

EE (Exchange Extension) is public domain and the (EE) is free use and the fiscal and physical responsibility (individual or corporation) is on whoever uses it as a financial tool. The (EE) has the functionality to be used as an asset exchange tool in test networks, if the end user or developer or implementer either an individual or corporation in the main asset exchange networks is used for different purposes other than testing will be governed under the terms listed below.

All code and documentation in EE has been dedicated to the public domain by the authors. All code authors and representatives of the companies they work for have signed affidavits dedicating their contributions to the public domain, and the originals of these affidavits are stored in a (virtual) safe at the COINsolidation Estonia headquarters (Virtual Storage Mode). Any person is free to publish, use or distribute the original COINsolidation EE extensions, either as source code or as compiled binaries, for any purpose, commercial or non-commercial, and by any means on a trial basis.

The previous paragraph applies to the deliverable code and documentation in EE those parts of the EE library that actually groups and ships with a larger application. Some scripts used as part of the compilation process (for example, "configuration" scripts generated by autoconf and other programs related to its operation) may be included in other open source licenses. However, none of these compilation scripts make it into the final EE deliverable library, so the licenses associated with those scripts should not be a factor in assessing your rights to copy and use the EE library.

All deliverable code in the US has been written from scratch. No code has been taken from other projects or from the open Internet. Each line of code can be traced back to its original author, and all those authors have public domain dedications on file. Therefore, the EE code base is clean and not contaminated with code licensed from other open source projects, not open contribution

EE is open source, which means you can make as many copies as you want and do what you want with those copies, without limitation. But EE is not open source. To keep EE in the public domain and ensure that the code is not contaminated with proprietary or licensed content, the project does not accept patches from unknown people. All code in EE is original, as it has been written specifically for use by EE. No code has been copied from unknown sources on the Internet.

EE is in the public domain and does not require a license. However, some organizations that want legal proof of their right to use EE can sign a license with an agreed cost between physical or moral companies.

It is clear to the user (developer) or end user that in case of using the software falling under the following conditions:

- You want to have a tangible legal document as evidence that you have a legal right to use and distribute from the U.S.

- Your legal department tells you to buy a license.

If any of the above circumstances apply to you, EE, the company that employs all EE developers, will sell you a Title Warranty for EE. A Title Warranty is a legal document that states that the claimed authors of EE are the true authors, and that the authors have the legal right to dedicate the EE to the public domain, and that COINsolidation International will vigorously defend against licensing claims. All proceeds from the sale of the EE title warrants are used to fund the continuous improvement and support of EE.

Contributed code

To keep EE completely free and royalty-free, the project does not accept patches. If you would like to make a suggested change and include a patch as a proof of concept, that would be great. However, don't be offended if we rewrite your patch from scratch. The type of non-commercial or opensource license who uses it in this modality and any similar without purchase of support either individual or corporate use no matter the size of the company will be governed by the following legal premises.

Warranty disclaimer. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) "AS IS", **WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either** express or implied, including, without limitation, any warranties or conditions of TITLE, NONINFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the correct use or redistribution of the Work or use of (EE) and for assuming any risk associated with your exercise of permissions under this License.

Any economic loss or of some type by the use of this software the affected one will not have option of payment of any type. In the event that the user wishes to initiate a legal dispute, the parties will submit to court only in the jurisdiction that COINsolidation International indicates to the plaintiff and within the times indicated by COINsolidation International without the option to demand any type of economic retribution, nor will they be able to demand any type of legal or judicial pressure.

For support, use and commercial licensing an agreement or contract must be established between COINsolidation or its corporate and the interested party.

The terms and conditions of distribution and marketing may change without notice, go to the official website of www.COINsolidation.org to see any modification of support and licensing clauses non-commercial and commercial, if you do not find the desired information the user may request license@COINsolidation.org

Any person, user, private or public entity of any legal nature or from any part of the world who simply uses the software accepts without conditions the clauses established in this document and those that can be modified at any time on the website of

www.COINsolidation.org without prior notice and may be applied at the discretion of COINsolidation Internationl in non-commercial or commercial use.

Any doubt and information about EE should be addressed to the App Inventor community or to the communities of various Blockly systems as they are: AppBuilder, Konduar, Trunkable, etc. and/or to the mail opensource@COINsolidation.org for the demand of questions can take the answer some working days.

Any subject, concept or description that is related to the terms and conditions of use not mentioned in this document may be updated by COINsolidation International and OpenQbit at any time, without prior notice, and the user is aware of and will abide by the changes without any claim or compensation of any kind.

Any FinTech law or any law related to "**LAW REGULATING FINANCIAL TECHNOLOGY INSTITUTIONS" will be** applicable only in the country of release Estonia, and will only be based on any economic income to COINsolidation.org and OpenQbit.com are based on donations from users and that at no time do COINsolidation.org or OpenQbit.com retain, store or guard any crypto assets (cryptomonedas or tokens) or any accounts (private and/or public address) of Cryptomonedas or tokens or any type of current currency accounts (fiat).

Support with commercial use.
